

Polissya LLC

Dear Colleagues!

Since 2012 Polissya LLC has been developing a unique red granite field, which is located in the north of the Zhytomyr region of Ukraine.

Our granite is pink coloured stone with even distribution of medium grains. The mining field is characterized as a solid mass granite deposit. Overall colour of the granite is gray-pink, consists of a main body of pink with a smoky-gray quartz grains and small dark stars of black mica (biotite). Granite is well to be sawed, sanded and polished until mirror surface. There is no friability at the edges of burnished surfaces

Name	Value	Units of measurement
True density	2,63 - 2,66	g/cm ³
Radiation-hygienic evaluation	I (first)	Application class
Water absorption	0,11-0,15	%
Pressing strength of stone in a dry condition	2294-2320	kgf/cm ²
Porosity	1.12-1.49	%
Frost resistance (ratio)	0,79 - 0,91	after cycles 50

Granite is a strong and durable material. It can be used for all types of construction works and interior decoration too. Our granite is not radioactive and refers to the First Class of construction use.

We offer a variety of granite products in any quantity, in slabs, tiles, curbs, pavers, etc., and also granite blocks in different sizes.

We will be glad to serve you!
