

ViteoTM

fruits and vegetables processing

Dear Sirs!

The company “ArtBudService” is pleased to inform you about launch of a new international investment project, namely, construction of a plant for fruits and vegetables processing in the territory of Ukraine.

The project, which is titled VITEO, is an affiliated company that carries out activities in the field of agriculture.

VITEO fruit and vegetable processing focus area is our pride and at the same time responsibility to ultimate consumer. Our goal is to create efficient manufacturing facility, which will enhance potential of domestic agricultural sector.

As an experienced construction company, “ArtBudService” guarantees plant compliance with building and manufacturing standards. As progressive representatives of Ukrainian business, we ensure professional project implementation.

*Best regards,
CEO “ArtBudService”
Oleksandr Radchenko*

Welcome to the world of useful transformations

ViteoTM

fruits and vegetables processing

Viteo is a consolidated international project aimed at elaboration and implementation of new directions in the sphere of agricultural products processing that are absolutely novel to Ukraine.

Viteo company focuses on expansion and diversification of the production capacities of domestic agro-industrial complex. Viteo's main objective is to provide national market dried vegetables of own production. Being guided by import substitution policy, we offer wide range high quality and competitive products.

All technological processes which Viteo team is working on are carried out using the equipment from leaders of the industry (Bigtem Makine, Urshel, TOMRA) and meet ukrainian and international quality standards.

Dried vegetables from Viteo are selected Ukrainian products directly from the manufacturer.
